EAGLESCROFT

CONTENT CALENDAR

Eaglescroft: week 44 (Mon 26 Oct – Sun 1 Nov 2026)

LinkedIn · Facebook · X — Abuja to the world

Daily posting on LinkedIn (company page), Facebook and X. Topic lanes rotate across what Eaglescroft actually does: **AI automation · CRM · websites · digital marketing · video editing · SaaS and product updates · branding.**

Status key: READY graphic ready · BUILD I build it once resources land · NEEDS YOU needs something from you (see `2026-W44-resources.md`).

Day	Series	Lane	Post	Format	Status
Mon 26	Hangar Notes	Brand / AI	We don't just talk about AI. We run on it.	Single image (3D coin)	READY
Tue 27	Flight Report	CRM + outreach	13,000 raw records → 12,000+ scored leads	6-slide carousel	BUILD
Wed 28	Ground School	Video editing	Our AI-assisted video edit, step by step	6-slide carousel	BUILD NEEDS YOU
Thu 29	On the Radar	SaaS / CRM update	GoHighLevel's AI Employee: what it does, costs and who should skip it	5-slide carousel	BUILD
Fri 30	Cockpit Chat	AI in practice	Don't ask AI if your idea is good. Ask how it fails.	Single image (3D bubble)	READY
Sat 31	Ground School	AI automation	Your business never sleeps. Neither do your replies.	3-slide carousel (WhatsApp AI)	READY
Sun 1	Ground School	AI governance	Before you plug AI into your business, ask these 5 questions	Single image (3D lock)	READY

Posting times (WAT): LinkedIn 08:30 · Facebook 12:30 · X 08:00 and 18:30 (X gets the thread or a short cut). Links go in the first comment or reply, never in the post body.

Mon 26: "We don't just talk about AI. We run on it."

Graphic: `design/concepts/3d-set/post-1.png` READY · also pin as the intro post on every profile.

LinkedIn / Facebook

> We don't just talk about AI. We run on it.
>
> Eaglescroft is a digital agency rooted in Abuja and working with businesses around the world. Every day we use AI to research, build, automate and create, for our clients and for ourselves.
>
> From this week, we're opening the hangar doors:
> → Flight Reports: real problems we've solved with AI
> → Ground School: practical lessons you can use today
> → Hangar Notes: what we're building next
> → Cockpit Chat: how we actually work with AI
> → On the Radar: the updates that matter, minus the hype
>
> Real tools. Real workflows. No hype. What would you hand to AI first in your business? Tell us below.
>
> #Eaglescroft #AIForBusiness #PracticalAI #FutureOfWork

X

> We don't just talk about AI. We run on it. Every day at Eaglescroft, AI helps us research, build, automate and create. Starting today, we're showing you exactly how. Real tools, no hype. 🧵 Follow along.

Tue 27: Flight Report: "13,000 raw records. 12,000+ scored leads."

Graphic: 6-slide carousel built from `post-portrait` `BUILD`
1. Cover: the headline + "How we did it, step by step"
2. The problem: a raw list nobody could prioritise or personalise
3. Clean: dedupe, fix and enrich every record
4. Score: rank each lead on fit and intent
5. Write: an audit engine drafts a tailored opening hook per lead (a human reviews before anything is sent)
6. The lesson + CTA: "Your list is worth more than you think."

LinkedIn / Facebook

> 13,000 raw records. 12,000+ scored leads.
>
> A client came to us with a huge prospect list and one problem: nobody could tell who to call first, and every message sounded the same.
>
> So we built a lead engine:
> 1. Clean: removed duplicates, fixed broken fields, filled the gaps
> 2. Score: ranked every lead on how well they fit and how ready they look
> 3. Write: an AI audit engine drafted a tailored opening line for each prospect
>
> The team now starts every day with a ranked list and a personal hook for each call. A human still approves every message. That part stays human.
>
> The lesson: your old list is probably worth more than you think. It just needs a system.
>
> Want us to look at yours? Link in the first comment.
> #LeadGeneration #AIAutomation #CRM #Eaglescroft

X thread (6 posts): hook → problem → clean → score → write → lesson + link in reply.

Wed 28: Ground School: "Edit faster: our AI-assisted video workflow"

Graphic: 6-slide carousel, with screenshots of the editing timeline `BUILD` `NEEDS YOU`
1. Cover: "The 90-minute edit, now 30." *(use our real numbers; if we don't have them, headline: "Edit faster without cutting corners.")*
2. Script: AI drafts the script from a brief; we rewrite the hook ourselves
3. Voice: AI voice or a clean-up of the recorded voice
4. Rough cut: auto-captions and silence removal
5. Polish: B-roll, motion graphics and brand colours (still human craft)
6. CTA: "Need video that sells? We make it."

LinkedIn / Facebook

> Video is the most-watched format on every platform, and the most time-hungry to make.
>
> Here's the AI-assisted workflow we use at Eaglescroft:
> → Script: AI drafts from a brief, we rewrite the first 3 seconds by hand
> → Voice: clean-up or AI voice, depending on the brief
> → Rough cut: automatic captions and silence removal
> → Polish: B-roll, motion and branding, still done by a human editor
>
> AI does the heavy lifting. Taste is still human. Which step eats most of your time? 👇
> #VideoEditing #AIVideo #ContentCreation #Eaglescroft

Thu 29: On the Radar: "GoHighLevel's AI Employee, explained"

Graphic: 5-slide carousel `BUILD`
1. Cover: "Your CRM can now answer calls. Should it?"
2. What's in it: Conversation AI (chat and SMS), Voice AI (calls), Reviews AI, Content AI
3. What it costs: the add-on is reported at $50 or $97/month per sub-account, **on top of** the base plan
4. Who it's for, and who should skip it
5. Our take + CTA: "We audit GHL builds. Ask us before you switch it on."

LinkedIn / Facebook

> Your CRM can now answer your phone. Should it?
>
> GoHighLevel's "AI Employee" bundles AI for chat and SMS, phone calls, review replies and content into one add-on.
>
> Our honest take, from auditing HighLevel builds:
> Good fit: your leads already live in HighLevel and you miss calls after hours. Check first: the real monthly cost. The add-on is billed per sub-account, on top of your plan. Check first: language support for your customers before promising voice AI. Skip it: if your follow-up process is broken. AI will only automate the mess.
>
> Fix the process first, then switch on the AI.
> #GoHighLevel #CRM #AIAutomation #MarketingAutomation
>
> *(Before posting: re-check the current pricing and language support on HighLevel's site.)*

Fri 30: Cockpit Chat: "Ask AI how it fails."

Graphic: `design/concepts/3d-set/post-3.png` `READY`

LinkedIn / Facebook

> Don't ask AI if your idea is good. It will usually say yes.
>
> Ask it how your idea fails.
>
> The prompt we use before every big decision at Eaglescroft:
> "Here's my plan: [paste plan]. Act as a sceptical investor. Give me the 3 strongest reasons it could fail, and what would prove each one wrong."
>
> Then a human decides. Every time. Save this for your next planning meeting.
> #PracticalAI #PromptEngineering #Eaglescroft

X: the prompt as a single post plus the graphic.

Sat 31: Ground School: WhatsApp AI assistant

Graphic: `design/concepts/ai-reply/slide-1..3.png` READY

LinkedIn / Facebook

> It's 2:14 AM. A customer asks if you deliver to their area. Your team is asleep. Your WhatsApp assistant isn't.
>
> A well-built AI assistant can:
> → Answer the questions you get 50 times a day
> → Take the order or book the appointment
> → Save the lead to your CRM for the morning
> → Hand over to a human when it should
>
> What's stopping you from automating? Comment 1, 2, 3 or 4 (slide 2). We'll answer every one next week.
> #WhatsAppBusiness #AIChatbot #SmallBusiness #Eaglescroft

Comments on this post feed next week's calendar: one post per objection.

Sun 1: Ground School: "5 questions before you plug in AI"

Graphic: `design/concepts/3d-set/post-2.png` READY

LinkedIn / Facebook

> Before you plug AI into your business, ask these 5 questions:
> 1. Who can see our data?
> 2. Is it stored, or used to train the model?
> 3. Is every action logged?
> 4. Who is accountable when it's wrong?
> 5. Can we switch it off tomorrow?
>
> If a vendor can't answer all five clearly, wait. Save this for your next software demo.
> #AIGovernance #DataPrivacy #AIForBusiness #Eaglescroft

Week 44: what to drop in the Drive inbox

Folder: **Google Drive** → `Eaglescroft Socials Inbox`. Name files as below so I can match them. Phone photos and screenshots are fine; I'll crop, cut out and colour-match. Anything with client names, numbers, emails or faces of clients: send it anyway and I'll blur it, or blur it first if you prefer.

Needed this week (priority order)

#	File name	For	What exactly
1	`joshua-desk.jpg`	Joshua Mon 26	A photo of you at your desk or laptop. Natural light, from the chest up or over the shoulder. Or reply "use the team photo" and I'll use `team-joshua.png` from the brand kit
2	`video-timeline-1.png`, `-2.png`	Eaglescroft Wed 28	Screenshots of a video edit in progress (timeline, captions panel), plus our real before/after edit time if you know it
3	`video-agent-today.png`	Joshua Thu 29	A screenshot of the AI video agent (UI, output frame or code), plus one line on what worked and what broke that day
4	`lead-engine.png`	Eaglescroft Tue 27	Any screenshot of the lead list, scoring or the outreach hooks. I'll blur every name
5	`verdicts.txt`	Joshua Sat 31	One line each on the October AI updates you tried (GPT-6 / Claude Dashboards / Gemini 4)
6	`bigger-picture.txt`	Joshua Sun 1	Edits to the Sunday opinion draft, or your own version

Stock photos from Pexels (use your browser, save to the inbox)

Search pexels.com with these terms, and download the **Large** size (free for commercial use):

File name	Search term	Used in
`pexels-trader-phone-*.jpg` (2–3)	"african market trader phone", "woman shop owner smartphone"	Joshua Tue 27
`pexels-student-laptop-*.jpg` (2)	"african university student laptop", "lecturer library"	Joshua Wed 28
`pexels-office-team-*.jpg` (2)	"small office team meeting laptop", "diverse team workplace"	Joshua Fri 30
`pexels-video-editor-*.jpg` (1–2)	"video editor timeline", "content creator editing"	Eaglescroft Wed 28
`pexels-customer-service-*.jpg` (1)	"customer support headset smiling"	Eaglescroft Thu 29

Decisions I need from you

- [ ] Approve the two calendars, or mark what to swap.
- [ ] Is a photo of your face OK for the personal account? (The original brief said low-key.)
- [ ] Handles: which Eaglescroft and personal handles are live on LinkedIn, Facebook and X?
- [ ] Pidgin captions on Facebook: yes or no?

Already done (no resources needed)

Eaglescroft Mon 26, Fri 30, Sat 31 and Sun 1 graphics are ready in `design/concepts/`.
