

PERSONAL CONTENT CALENDAR

Joshua Obaje (personal): week 44 (Mon 26 Oct – Sun 1 Nov 2026)

JOSHUA OBAJE · FOUNDER & CTO, EAGLESCROFT

Daily on LinkedIn (personal) and X; Facebook/Instagram on the starred days. First person, everyday, practical. Visual style: **"the notebook"** (see `personal/strategy.md`).

Status key: READY graphic ready · BUILD I design it · NEEDS YOU needs something from you (see `2026-W44-resources.md`) · YOUR WORDS needs your own words or verdict.

Day	Series	Audience	Post	Format	Status
Mon 26 •	Today I built	Everyone	"I run my business on AI. From today, I'll show you how."	Photo card	READY
Tue 27 •	AI for…	Traders	3 free ways a trader can use AI on WhatsApp today	5-slide carousel	BUILD
Wed 28	AI for…	Academics	AI for a literature review, without cheating	6-slide carousel	BUILD
Thu 29	Today I built	Builders, founders	What I shipped today: the AI video agent	Screenshot card + X thread	BUILD NEEDS YOU
Fri 30 •	AI for…	Companies	The 1-page AI policy every small company needs	5-slide carousel	BUILD
Sat 31	Tested this week	Professionals	3 AI updates from October and my honest verdict	4-slide carousel	BUILD YOUR WORDS
Sun 1 •	The bigger picture	Everyone	Africa doesn't need to catch up on AI. It needs to apply it.	Quote card	BUILD YOUR WORDS

Mon 26: "I run my business on AI. From today, I'll show you how."

Graphic: `design/personal/w44-mon-intro/post.png` READY (portrait cut-out, notebook style).

LinkedIn

> For years I kept my profile quiet. That changes today.
>
> I'm Joshua, Founder & CTO of Eaglescroft. We build websites, AI chatbots, automations and video for businesses around the world, and we run our own business on the same tools.
>
> Every day I use AI to research, write, design, automate and ship. Most of what I learn would help a trader in Wuse Market, a lecturer marking 300 scripts or a company drowning in admin just as much as it helps me.
>
> So from today, I'm sharing it. Every day:
> → What I built, and what broke
> → How a trader, a lecturer or a company can use it tomorrow
> → The AI updates that actually matter
>
> Plain language. No hype. Follow along.

X: "Quiet profile for years. Changing that today. I run my agency on AI. Every day I'll show what I built and how you can use it. Plain language, no hype."

Tue 27: AI for traders: "3 free ways to use AI on WhatsApp today"

Graphic: 5-slide notebook carousel `BUILD` (Pexels: a trader with a phone, a market stall)
1. Cover: "Your phone is already an assistant. Use it."
2. Snap your price list → ask AI to turn it into a clean message you can send to customers
3. Ask AI to write 5 polite replies for the questions you get every day (price, delivery, "last price")
4. Send a voice note of today's sales → ask AI to total it and list what to restock
5. "Start with one. Tomorrow, add another."

LinkedIn

> If you sell anything, AI can save you an hour a day, for free, from the phone in your pocket.
>
> 3 things to try today:
> 1. Snap your price list and ask AI to turn it into a clean message for customers.
> 2. Ask it to write polite replies to the questions you answer 50 times a day.
> 3. Voice-note your day's sales and ask it to total them and list what to restock.
>
> Free tools are enough to start. Pick one and try it before you close today. Know a trader who should see this? Send it to them.

Facebook (Pidgin-friendly):

> If you dey sell anything, AI fit save you one hour every day, free, from your phone. Try these 3 today: snap your price list, make AI arrange am fine; make am write sweet replies for "how much last price?"; voice-note your sales, make e count am for you. Start with one. Share am give that your customer wey dey sell for market.

Wed 28: AI for academics: "Literature review, without cheating"

Graphic: 6-slide notebook carousel `BUILD`
1. Cover: "AI won't write your thesis. It can make you a faster researcher."
2. Find: use research search tools (for example Consensus or Semantic Scholar) to find real papers
3. Skim: ask AI to summarise each paper, **then read the ones that matter**
4. Check: verify every citation exists and says what AI claims. AI invents references
5. Write: your words, your argument. Use AI to critique the draft, not write it
6. Disclose: follow your institution's AI policy and say how you used it

LinkedIn

> Lecturers and students keep asking me the same question: "Is using AI for research cheating?"
>
> It depends on how you use it. Here's the line I'd draw:
> ✓ Finding papers faster: fine
> ✓ Summarising so you know what to read properly: fine
> ✓ Critiquing your draft: fine
> × Copying its citations without checking: dangerous, because AI invents references
> × Letting it write your argument: that's not your work any more
>
> Use AI to research faster, not to think less. Check your institution's policy and be open about how you used it.
> Academics: what rules is your department setting? I'd love to hear.

Thu 29: Today I built: "What I shipped today"

Graphic: screenshot card in the notebook frame, with marker annotations on 2–3 parts of the screen BUILD NEEDS YOU
Topic: progress on the AI video agent that turns a product into a motion video. YOUR WORDS Tell me one thing that worked and one thing that broke today.

LinkedIn (draft, edit with today's reality)

> Today I worked on the AI agent that turns a SaaS product into a motion video.
>
> What worked: [one line]
> What broke: [one line]
> What I learned: [one line]
>
> Building in public from now on. Tomorrow: [next step].

X thread: 4 posts: what it is → what worked → what broke → what's next.

Fri 30: AI for companies: "The 1-page AI policy"

Graphic: 5-slide notebook carousel BUILD
1. Cover: "Your team is already using AI. Do you have a policy?"
2. What's allowed: approved tools, and approved uses
3. What's never allowed: customer data, passwords or confidential files in public AI tools
4. Who checks: a human signs off anything that goes to a customer
5. Who to ask: one named person owns AI questions. Review the policy every quarter

LinkedIn

> Your team is already using AI. The question is whether they're using it safely.
>
> Every small company needs a 1-page AI policy. It only needs 4 parts:
> 1. Approved tools and approved uses
> 2. What never goes into public AI tools (customer data, passwords, confidential files)
> 3. A human checks anything that goes to a customer
> 4. One person owns AI questions, and the policy is reviewed every quarter
>
> One page beats no page. Save this and share it with whoever runs your operations.

Sat 31: Tested this week: "3 AI updates from October"

Graphic: 4-slide carousel with one update per slide + Joshua's verdict BUILD YOUR WORDS Candidate updates (verify before posting, since names and dates differ between sources):
- **ChatGPT:** GPT-6 with "Intelligent UI", which can reply with charts, forms and small tools
- **Claude:** Dashboards and Motion (beta, from 8 Oct)
- **Gemini:** Gemini 4 for long, complex workflows (from 13 Oct)

YOUR WORDS **Needs your verdict:** try at least one this week. One line each: "Useful for ___ / Not yet because ___."

LinkedIn (draft)

> 3 AI updates landed this month. I tested them on real work, so you don't have to.
> [Update 1]: [your verdict]
> [Update 2]: [your verdict]
> [Update 3]: [your verdict]
> The one I'll keep using: [pick].

Sun 1: The bigger picture

Graphic: quote card in the notebook style, with the key line in navy Sora and a blue marker underline `BUILD` `YOUR WORDS` **Your opinion, your words:** I've drafted a starting point.

LinkedIn (draft)

> Africa doesn't need to catch up on AI. It needs to apply it.
>
> We don't have to build the biggest models to win. We have to be the best at using them:
> for the trader, the clinic, the school, the small manufacturer.
>
> The tools are on every phone already. What's missing is people who translate them into everyday work. That's the job I've chosen.
>
> What's one problem in your city that AI could actually fix?

Optional: if you're comfortable, add one line about your national service at NITDA's National Centre for Artificial Intelligence and Robotics (it's in your approved bio).

Week 44: what to drop in the Drive inbox

Folder: **Google Drive** → `Eaglescroft Socials Inbox`. Name files as below so I can match them. Phone photos and screenshots are fine; I'll crop, cut out and colour-match. Anything with client names, numbers, emails or faces of clients: send it anyway and I'll blur it, or blur it first if you prefer.

Needed this week (priority order)

#	File name	For	What exactly
1	`joshua-desk.jpg`	Joshua Mon 26	A photo of you at your desk or laptop. Natural light, from the chest up or over the shoulder. Or reply "use the team photo" and I'll use `team-joshua.png` from the brand kit
2	`video-timeline-1.png`, `-2.png`	Eaglescroft Wed 28	Screenshots of a video edit in progress (timeline, captions panel), plus our real before/after edit time if you know it
3	`video-agent-today.png`	Joshua Thu 29	A screenshot of the AI video agent (UI, output frame or code), plus one line on what worked and what broke that day
4	`lead-engine.png`	Eaglescroft Tue 27	Any screenshot of the lead list, scoring or the outreach hooks. I'll blur every name
5	`verdicts.txt`	Joshua Sat 31	One line each on the October AI updates you tried (GPT-6 / Claude Dashboards / Gemini 4)
6	`bigger-picture.txt`	Joshua Sun 1	Edits to the Sunday opinion draft, or your own version

Stock photos from Pexels (use your browser, save to the inbox)

Search pexels.com with these terms, and download the **Large** size (free for commercial use):

File name	Search term	Used in
`pexels-trader-phone-*.jpg` (2–3)	"african market trader phone", "woman shop owner smartphone"	Joshua Tue 27
`pexels-student-laptop-*.jpg` (2)	"african university student laptop", "lecturer library"	Joshua Wed 28
`pexels-office-team-*.jpg` (2)	"small office team meeting laptop", "diverse team workplace"	Joshua Fri 30
`pexels-video-editor-*.jpg` (1–2)	"video editor timeline", "content creator editing"	Eaglescroft Wed 28
`pexels-customer-service-*.jpg` (1)	"customer support headset smiling"	Eaglescroft Thu 29

Decisions I need from you

- [ ] Approve the two calendars, or mark what to swap.
- [ ] Is a photo of your face OK for the personal account? (The original brief said low-key.)
- [ ] Handles: which Eaglescroft and personal handles are live on LinkedIn, Facebook and X?
- [ ] Pidgin captions on Facebook: yes or no?

Already done (no resources needed)

Eaglescroft Mon 26, Fri 30, Sat 31 and Sun 1 graphics are ready in `design/concepts/`.
